Education

Cornell University, College of Agriculture and Life Sciences

Ithaca, NY

Degree: Bachelor of Science, Information Science (Data Science) | Plant Science (Plant Genetic Engineering)

Awards: Phlo Nucleate Plant Hackathon (2025), Young Adult Silver President's Volunteer Award (2023), College Board National Indigenous Recognition Program (2022), National Merit Commended Scholar (2023)

Work Experience

Moghe Lab

Ithaca, New York

Undergraduate researcher

September 2026 - Present

- Undergraduate field work, wet lab, and bioinformatics researcher for computational biology and biochemical research
- Researching different locis on chromosomes to identify tomato survival genes in wild and domesticated type plant genomes

Syngenta

Stanton, Minnesota

Corn Breeding, Germplasm, and Data Science Intern

May 2026- August 2026

- Quality control data filtration of over 1 million data points for accuracy in genomic and phenotypic predictive algorithms in corn using R Statistical software to run a 5-fold prediction model returning higher prediction accuracy values than initially
- Large data analysis in genome wide selection for breeding prediction standardization for context in certain heritable traits

Celsius

Boca Raton, Florida

Student Marketing and Outreach

July 2025- Present

- Works as a student marketing ambassador utilizing client data, marketing techniques, and outreach to promote products
- Utilizes marketing tactics and community outreach to create lasting relationships between the brand and campus organizations

R2 Surgical

Toledo, Ohio

Program Marketing and Outreach Intern

June 2025- August 2025

- Sales and marketing intern for program sales and promotion within the surgical tools industry to promote sustainability
- Organized meetings and deals between clients and leveraged data points and market tractions to appeal to large communities

Boyce Thompson Institute of Research

Ithaca, New York

Undergraduate researcher

October 2024 - May 2026

- Working in a graduate student lab as an undergraduate computational biologist and lab assistant using python PANDAS
- Researching different locis on chromosomes to identify tomato survival genes in wild and domesticated type plant genomes

USAID Feed The Future Lab Innovation Center for Horticulture

Davis, California

Intern for Research, Outreach, and Communications

July 2023-August 2024

- Collaborated with the World Bank, African Union, international fellowships, and CEOs to reduce post harvest product loss
- Developed new technologies for use in post harvest management in rural areas create an easily usable blueprint for drying

Leadership Experience and Activities

Delta Delta Delta

Ithaca, New York

Director of Lifetime Membership

March 2026

- The liaison of the Alpha Beta chapter of Delta Delta Delta, alumnae members, and other chapters to create a large network
- Head of the outreach and event planning for future and current alumnae to develop and maintain strong relationships

Nucleate Phlo Plant Hack

Remote

2025 Plant Hack Winner

July 2025

- Created a GM product pitch focused on millet to increase nutrition security in rural India and increase profitability for farmers
- Presented a research business model for a start-up to thrive as a company in today's economy and oversaturated market

CUSD - Aquaculture

Ithaca, New York

Executive Board, Aquaculture Co-Lead

September 2024 -Present

- Co-lead on the CUSD research team, organizing the team to research both biological and computational aspects of aquaculture
- Studies fish feeding habits using machine learning to analyze fish movement patterns over time in a closed environment

Skills

Technical Skills: Google (Expert), Notion (Expert), Microsoft (Intermediate), Python (Intermediate), PANDAS (Intermediate), HTML/CSS/Javascript (Intermediate), Transcription (Expert), R Studio/R (Intermediate), Claude Code (Intermediate)

Languages: English (Fluent), Spanish (Conversational), Korean (Novice)
